

Explain what you do to keep sprints on schedule.

- Daily Standups
- For crucial task, we do pair programming
- For any blockers or issues raised in the standup we reach out for help
- For data-related tasks we have created mock data
- For tasks that rely on underlying database schemas we schedule meeting at the beginning of the sprint

The story that comes before must have been complete for to proceed further

Ex. To start FIN-24 it required FIN-128 and FIN-22 to be completed.
